9713/11

Paper 1 Written A

May/June 2016

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2016 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

1 (a)

[6]

Mobile phone:

A phone that can make/receive calls/messages while the user is on the move
To stay in contact with head office/shops/ to store his appointments/store phone numbers of shops/colleagues/to phone shop if going to be late for an appointment

DVD player:

A battery powered device that replays DVDs
For watching videos about new products/to show videos of toys to shops/to study training videos

Satellite navigation system:

A system that pinpoints a user's position/finds the quickest way to a location
To direct salesperson to customer shops/ to allow salesperson to miss traffic holdups so that appointments are met/to pinpoint the location of a shop

2 marks available for each

(b) **Three** matched pairs from:

[6]

Two from:

Salesperson should have a duty of confidence
Salesperson should sign a confidentiality agreement
Must keep the details of orders confidential
Must not share data collected with any other person or organisation
Must treat the information as confidential/it must be obvious to them that the information is given in confidence

Two from:

Salesperson should have a duty of fidelity
Must be loyal to Mytoy...
...for as long as they are employed
Must not give information (about new toys/customers) to a rival company
Employee is free to use skills and knowledge acquired from company after they leave them

Two from:

MyToy should anonymise information wherever possible
MyToy should aggregate information wherever possible
Limited amount of information should be collected/transmitted

Two from:

MyToy and its employees must abide by the Data Protection Act
Any 2 examples of a DPA principle

Page 3	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

(c) **Three** pairs of answers from:

[6]

Database

Two from:

Used to store customer/toy shop data

Used to store customer orders

Salesperson can prepare for visit with knowledge of customer details

Sales/orders can be added to/edited during the course of a visit

Customer details can be added to/edited during the course of the visit

Charts produced showing sales per shop

Spreadsheet

Two from:

When an order is taken the salesperson will use the spreadsheet to calculate the cost of the order

Can be used to provide an invoice for the customer

Can be used to show trends of customer sales

Web browser

Two from:

Allows the salesperson to show the customer information/images that will answer questions about toys

Can be used by salesperson to look up customer's web site to prepare for visit

Email software

Two from:

Allows salesperson to send emails to head office

Can email customer/store to confirm planned visit

Can email customer/store to confirm orders

Presentation software

Two from:

To advertise new products to customers/stores

To show details of all the products to customers/stores

To show potential earnings to customers/stores

To enable salespeople to be kept up to date with training presentations

To create slideshows of products to show customers/shops

To create slideshows to show sales progress to managers

Time management software

Two from:

To organise appointments with customers/stores

To help with daily and weekly planning

Alerts to start of meeting with customer

Page 4	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

2 (a) Six from: **[6]**

Each operator has a computer to provide data about the toys
 Each operator has a headset to communicate with customer
 Each operator's computer contains a telephony card
 Card allows a link to the telephony server
 The server directs a call to the appropriate operator
 Calls up matching customer records
 Displays the script for the operator
 Can record conversations/calls with customer
 Software enables on-screen phone control such as answer, hang up, hold, conference, re-dial
 Description of IVR (interactive voice response)
 Displays caller ids
 Queues calls
 The operator's phone communicates directly with the server
 The server controls all the phones
 The operator's computer does not control/is not controlled by the phone although it may be physically connected
 Any computer in the system can be used to control any phone
 Allow supervisors, for example, to intervene if the call proves too complex for the operator to handle

(b) (i) Three from: **[3]**

Emails may contain a virus, including a description of the result
 Email may be SPAM, which can alert the sender to the fact it is a valid email address
 Email might contain offensive material upsetting the customer
 Spyware can be attached to an email

(ii) Three from: **[3]**

Email could be from an unknown new sender
 Emails containing attachments
 Attachments could have unusual file extensions...
 ...e.g. .exe, .bat, .com
 Email might contain no subject line
 Email address of sender is not the same as normal MyToy email address
 Anti-virus software may inform you
 If email has been sent to spam/junk folder

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

3 (a) (i) Observation: [2]

Benefit

Enables the systems analyst to see the process as a whole

Drawback

Explanation of the 'Hawthorne effect'

(ii) Questionnaires: [2]

Benefit

Answers tend to be, on the whole, more accurate/everyone can complete the questionnaire at the same time instead of one after the other (as with interviews)/can complete it at their leisure

Drawback

It is very difficult to ask further questions based on the response to another question/can be anonymous and so may not be taken seriously by user

(iii) Interviews: [2]

Benefit

Interviewer can move away from their 'script' and ask a more in-depth question if a particular response is given/can interpret body language

Drawback

Users have to be available at the time the systems analyst wants to interview them/may not have the time/can take a long time to interview all the users
Interviewees might try and provide answers which they think the interviewer wants to hear

(b) Six from: [6]

- Parallelogram shows input to the system
- Rectangles show individual processes
- Cylinder shows data that is stored on (magnetic) hard disks
- Final symbol represents output/printout
- The arrows show the direction of flow of data
- The processing of a customer payment

(c) (i) Three from: [3]

- May be in danger of losing their jobs
- May have to be retrained
- Some workers may have to/may have the opportunity to go part time
- There may be the opportunity to job share
- There may be the opportunity for flexible working hours
- There may be the opportunity to work compressed hours
- Workers may need to have the ability to move from branch to branch
- May change job because technical jobs made available

Page 6	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

(ii) **Three** from: [3]

May lose the branch in their town
 Might be concerned that hackers might hack into account and transfer funds to own account
 Expense of buying a computer with a broadband internet connection
 Unable to make cash deposits or withdraw cash without physically going to the bank or to an ATM
 Reliability of internet connection cannot be guaranteed so may not be able to carry out transaction
May not like it that the bank is not providing the 'personal touch'
 May mismanage accounts as it is so easy to transfer money from one account to another
 Security concerns about data transmitted over internet such as hacking, phishing, pharming, spyware, viruses, malware
 Description of phishing
 Description of pharming
 Description of viruses

4 (a) **Six** from: [6]

Required temperature is input using remote control/touchscreen /number pad
 Sensor is used to monitor current temperature of the room
 Sensor sends reading to the computer
 Computer compares temperature from sensor to the pre-set value
 If sensor temperature is higher/lower than pre-set value computer sends a signal...
 ...to the actuator
 ...if lower computer/actuator switches heater on
 ...if higher then computer/actuator switches heater off

(b) (i) **Four** from: [4]

All records will be processed when the payroll is run/no records will be missed
 They need to be in same order as master file
 Processing time will be reduced
 Payroll uses batch processing and sequential files are better suited to batch processing

(ii) **Two** from: [2]

Individual records may be slower to find
 Individual records may take longer to edit
 A record can only be replaced if the new record is exactly the same length as the original
 Records can only be updated if the data item used to replace the existing data is exactly the same length

5 (a)

Field Name	Data Type	Example data
ItemName	Text	Boiler
NumberInStock	Integer	236
Price	Currency	\$14.95
ItemLocation	Text	06:71:03
MinimumStock	Integer	100

Field Name	Data Type
SupplierName	Text
SupplierAddress	Text
SupplierEmail	Text
DiscountOnPrice	Integer/currency
OrderPlaced	Boolean/Date

Five from:

[5]

All 5 Text only data types
 NumberInStock and MinimumStock set to integer
 Price set to Currency
 DiscountOnPrice set to integer/currency
 OrderPlaced set to Boolean/Yes or No/Date

(b) Four from:

[4]

A field that will be common to both the ITEM table and the SUPPLIER table
 A field which will contain unique data
 Needed to act as the link field between the tables
 Acts as the key field in the Item/Supplier table
 Acts as foreign key in the Supplier/Item table

(c) Five from:

[5]

Type check on NumberInStock: must be numeric
 Range check on NumberInStock: between 50 and 500
 Type check on Price: must be numeric
 Range check on Price: between \$20 and \$1000
 Format check on ItemLocation: Three pairs of digits separated by colons
 Length check on ItemLocation: must be 8 characters
 Range check on MinimumStock: between 20 and 100
 Type check on MinimumStock: must be numeric

Page 8	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2016	9713	11

6 Six from:

[6]

A system of versions can be used
 Editor protects document as tracked changes/comments only
 Publishes it online to restricted website/sends it to members
 Each member of the group saves their version with a file name/number
 Each member must save their version with a different version name/number
 Each file name could have the member's initials appended
 Each member uploads file after editing to restricted website/send it to secretary
 The secretary can then decide which corrections should be used, if any
 Member versions of the report can then be merged to show all suggested amendments from which the secretary can choose
 Tracked changes
 ...so that the changes can be clearly seen
 ...and either accepted or rejected
 The secretary will be responsible for ensuring that version numbering is maintained (and that deadlines are met)
 Alternatively one file is used
 Each member comments on the file and sends it to the next member
 Comments can be in a different colour for each member of the group
