Paper 2 Core Studies 2

**October/November 2018**

MARK SCHEME

Maximum Mark: 70

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **11** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks												
1	<b>Maguire et al. (taxi drivers) carried out an experiment which studied activation of the right hippocampus. An alternative way to investigate this would be to use the case study method.</b>													
1(a)	<p><b>Describe the features of the case study method.</b></p> <p>Any five correct points. 1 mark for each point up to a maximum of five points</p> <p>Indicative content: Involves a few participants. Participants are often ‘special’ in some way. Lots of detailed data/qualitative data mainly collected Often takes place over a long period of time. Often looks at development of the individual or small group. Researchers can build a relationship with the participant. May be in context of research/therapy.</p> <p>An explained example is acceptable but will only be given a maximum of one mark (no credit for just naming a researcher/study).</p> <p>1 mark for naming an appropriate method used within a case study e.g. interview.</p>	<b>5</b>												
1(b)	<p><b>Design an alternative way to investigate activation of the right hippocampus as a case study and describe how it could be conducted.</b></p> <p>Candidates should describe the <i>who</i>, <i>what</i>, <i>where</i> and <i>how</i>.</p> <p>Major omissions include the <i>who</i>, <i>what</i> and <i>how</i>. Candidates must describe the behaviour being measured (e.g. activation of right hippocampus). Some details must be given of who the participant(s) is in the study to indicate it is a case study and how the data is collected from participant (e.g. through a brain scan, etc.)</p> <p>Minor omissions include further details of <i>who</i>, <i>where</i> and unclear details of <i>what</i> and <i>how</i> (e.g. specific scanner used such as a PET scan).</p> <table border="1" data-bbox="320 1518 1310 1977"> <tbody> <tr> <td data-bbox="320 1518 1206 1585">Alternative study is incomprehensible.</td> <td data-bbox="1206 1518 1310 1585">0</td> </tr> <tr> <td data-bbox="320 1585 1206 1653">Alternative study is muddled and impossible to conduct.</td> <td data-bbox="1206 1585 1310 1653">1–2</td> </tr> <tr> <td data-bbox="320 1653 1206 1753">Alternative study is muddled but possible and/or there are major omissions.</td> <td data-bbox="1206 1653 1310 1753">3–4</td> </tr> <tr> <td data-bbox="320 1753 1206 1821">Alternative study is clear with 2+ minor omissions.</td> <td data-bbox="1206 1753 1310 1821">5–6</td> </tr> <tr> <td data-bbox="320 1821 1206 1910">Alternative study is described with one minor omission and in some detail.</td> <td data-bbox="1206 1821 1310 1910">7–8</td> </tr> <tr> <td data-bbox="320 1910 1206 1977">Alternative study is described in sufficient detail to be replicable.</td> <td data-bbox="1206 1910 1310 1977">9–10</td> </tr> </tbody> </table>	Alternative study is incomprehensible.	0	Alternative study is muddled and impossible to conduct.	1–2	Alternative study is muddled but possible and/or there are major omissions.	3–4	Alternative study is clear with 2+ minor omissions.	5–6	Alternative study is described with one minor omission and in some detail.	7–8	Alternative study is described in sufficient detail to be replicable.	9–10	<b>10</b>
Alternative study is incomprehensible.	0													
Alternative study is muddled and impossible to conduct.	1–2													
Alternative study is muddled but possible and/or there are major omissions.	3–4													
Alternative study is clear with 2+ minor omissions.	5–6													
Alternative study is described with one minor omission and in some detail.	7–8													
Alternative study is described in sufficient detail to be replicable.	9–10													

Question	Answer	Marks												
1(c)	<p><b>Evaluate this alternative way of studying activation of the right hippocampus in methodological and practical terms.</b></p> <p>Candidates need to consider a number of points regarding their study. These points can be positive and/or negative.</p> <p>Appropriate points could include a discussion about:</p> <p>Time consuming            Difficult to find a willing and suitable participant to be in the study            Ethical issues            Generalisability of the sample            Ecological validity of the case study            Poor/strong validity due to data collection method chosen in the case study            Good reliability if highly controlled or poor reliability if lacking in controls            Social desirability/demand characteristics if staff/patients realise they are being studied.            Strengths and weaknesses of qualitative/quantitative data collected            Researcher bias            Difficulties in collecting data in a case study            Detailed findings            Any appropriate issues with equipment used            Any other appropriate point.</p> <table border="1" data-bbox="320 1055 1310 1581"> <tbody> <tr> <td data-bbox="320 1055 1206 1122">No evaluation</td> <td data-bbox="1206 1055 1310 1122">0</td> </tr> <tr> <td data-bbox="320 1122 1206 1189">Evaluation is muddled and weak.</td> <td data-bbox="1206 1122 1310 1189">1–2</td> </tr> <tr> <td data-bbox="320 1189 1206 1290">Evaluation is simplistic and not specific to the investigation. May include one point that is brief and specific to the investigation.</td> <td data-bbox="1206 1189 1310 1290">3–4</td> </tr> <tr> <td data-bbox="320 1290 1206 1379">Evaluation is simplistic but specific to the investigation (may include general evaluation). May include one detailed point.</td> <td data-bbox="1206 1290 1310 1379">5–6</td> </tr> <tr> <td data-bbox="320 1379 1206 1480">Evaluation is good and specific to the investigation. Two or more points.</td> <td data-bbox="1206 1379 1310 1480">7–8</td> </tr> <tr> <td data-bbox="320 1480 1206 1581">Evaluation is detailed and directly relevant to the investigation. Two or more points.</td> <td data-bbox="1206 1480 1310 1581">9–10</td> </tr> </tbody> </table>	No evaluation	0	Evaluation is muddled and weak.	1–2	Evaluation is simplistic and not specific to the investigation. May include one point that is brief and specific to the investigation.	3–4	Evaluation is simplistic but specific to the investigation (may include general evaluation). May include one detailed point.	5–6	Evaluation is good and specific to the investigation. Two or more points.	7–8	Evaluation is detailed and directly relevant to the investigation. Two or more points.	9–10	10
No evaluation	0													
Evaluation is muddled and weak.	1–2													
Evaluation is simplistic and not specific to the investigation. May include one point that is brief and specific to the investigation.	3–4													
Evaluation is simplistic but specific to the investigation (may include general evaluation). May include one detailed point.	5–6													
Evaluation is good and specific to the investigation. Two or more points.	7–8													
Evaluation is detailed and directly relevant to the investigation. Two or more points.	9–10													

Question	Answer	Marks
2	<b>Haney, Banks and Zimbardo conducted a study to investigate social roles in a mock prison.</b>	<b>1</b>
2(a)	<p><b>Outline what is meant by the ‘situational explanation of behaviour’ in psychology.</b></p> <p>1 mark partial, 2 marks full.</p> <p>Situational explanation of behaviour is where behaviour is explained because of the situation we are in. – 1 mark</p> <p>This is where our behaviour is explained in terms of the physical or social context/situation we are in. For example, we might be aggressive because we were raised in an aggressive home. – 2 marks</p> <p>Explanations are based on factors which are external to the individual such as other people, the setting or the place and not due to our biology or genetic make-up. – 2 marks</p> <p>An example of a situational explanation of behaviour on its own can achieve up to 1 mark.</p>	<b>2</b>
2(b)	<p><b>Describe <u>one</u> finding from the Haney, Banks and Zimbardo study that supports the situational explanation of behavior.</b></p> <p>1–2 marks partial, 3 marks full.</p> <p>Indicative content:</p> <p>Any finding that shows how the situation affected the participants (either the guards or the prisoners or both).</p> <p>The guards became increasingly verbally abusive during the study. – 1 mark</p> <p>The guards became increasingly verbally abusive during the study due to uniform they wore which made them feel superior to the prisoners. – 2 marks</p> <p>The guards became increasingly verbally abusive during the study due to uniform they wore which made them feel superior to the prisoners. This highlights the situational explanation as it shows how the power the guards were given affected their behaviour. – 3 marks</p>	<b>3</b>

Question	Answer	Marks												
2(c)	<p><b>Discuss the strengths and weaknesses of investigating the situational explanation of behaviour using the Haney, Banks and Zimbardo study as an example.</b></p> <p>Appropriate strengths and weaknesses will be varied. These could include:</p> <p>Strengths</p> <ul style="list-style-type: none"> <li>• Useful</li> <li>• Research is often high in mundane realism</li> <li>• Many aspects of social situation are often considered so holistic</li> <li>• Explanatory power.</li> </ul> <p>Weaknesses</p> <ul style="list-style-type: none"> <li>• Validity of measures</li> <li>• The research is often unethical as participants are placed in uncomfortable social situations</li> <li>• Difficult to create completely realistic situations</li> <li>• Determinism results as suggests situational factors are sole cause of behaviour</li> <li>• Ignores individual differences</li> <li>• Sample (clearly linked to the situational explanation)</li> <li>• Difficult to determine if behaviour is due to the situation or the disposition of participants.</li> </ul> <p>Any other appropriate point.</p> <table border="1" data-bbox="320 1144 1310 1834"> <tbody> <tr> <td data-bbox="320 1144 1206 1240">No comment on the strengths and weaknesses of the situational explanation.</td> <td data-bbox="1206 1144 1310 1240">0</td> </tr> <tr> <td data-bbox="320 1240 1206 1305">Comment given but muddled and weak.</td> <td data-bbox="1206 1240 1310 1305">1–2</td> </tr> <tr> <td data-bbox="320 1305 1206 1541">           Consideration of at least a strength and a weakness not specific to investigation  <b>OR</b>            Consideration of either a strength/weakness that is specific to situational explanation and investigation (could be two strengths and/or two weaknesses on its own).         </td> <td data-bbox="1206 1305 1310 1541">3–4</td> </tr> <tr> <td data-bbox="320 1541 1206 1637">Consideration of two or more points (at least one strength and one weakness) which are clear and specific to investigation.</td> <td data-bbox="1206 1541 1310 1637">5–6</td> </tr> <tr> <td data-bbox="320 1637 1206 1733">Consideration of at least two strengths and two weaknesses which are clear and specific to investigation.</td> <td data-bbox="1206 1637 1310 1733">7–8</td> </tr> <tr> <td data-bbox="320 1733 1206 1834">Consideration of at least two strengths and two weaknesses which are good and directly relevant to the investigation.</td> <td data-bbox="1206 1733 1310 1834">9–10</td> </tr> </tbody> </table>	No comment on the strengths and weaknesses of the situational explanation.	0	Comment given but muddled and weak.	1–2	Consideration of at least a strength and a weakness not specific to investigation <b>OR</b> Consideration of either a strength/weakness that is specific to situational explanation and investigation (could be two strengths and/or two weaknesses on its own).	3–4	Consideration of two or more points (at least one strength and one weakness) which are clear and specific to investigation.	5–6	Consideration of at least two strengths and two weaknesses which are clear and specific to investigation.	7–8	Consideration of at least two strengths and two weaknesses which are good and directly relevant to the investigation.	9–10	10
No comment on the strengths and weaknesses of the situational explanation.	0													
Comment given but muddled and weak.	1–2													
Consideration of at least a strength and a weakness not specific to investigation <b>OR</b> Consideration of either a strength/weakness that is specific to situational explanation and investigation (could be two strengths and/or two weaknesses on its own).	3–4													
Consideration of two or more points (at least one strength and one weakness) which are clear and specific to investigation.	5–6													
Consideration of at least two strengths and two weaknesses which are clear and specific to investigation.	7–8													
Consideration of at least two strengths and two weaknesses which are good and directly relevant to the investigation.	9–10													

Question	Answer	Marks												
2(d)	<p><b>Discuss the extent to which the Haney, Banks and Zimbardo study was ethical.</b></p> <p>Appropriate points will be varied. These could include:</p> <p>Good ethics due to:</p> <ul style="list-style-type: none"> <li>• Debriefed at the end</li> <li>• Informed consent</li> <li>• Could withdraw from study</li> <li>• Names were never released</li> </ul> <p>Poor ethics due to:</p> <ul style="list-style-type: none"> <li>• Not fully informed consent as the full nature of the study was not revealed.</li> <li>• Difficult to withdraw</li> <li>• Psychological harm</li> <li>• Video footage taken</li> </ul> <table border="1"> <tr> <td>No comment on ethics.</td> <td>0</td> </tr> <tr> <td>Comment given but muddled and weak.</td> <td>1–2</td> </tr> <tr> <td>Consideration of ethics but not specific to investigation <b>OR</b> Consideration of ethics but is simplistic and brief but specific to investigation.</td> <td>3–4</td> </tr> <tr> <td>Consideration of ethics is simplistic but specific to investigation. May include one detailed point.</td> <td>5–6</td> </tr> <tr> <td>Consideration of ethics which is good but brief and specific to investigation. (Two or more points in some detail.)</td> <td>7–8</td> </tr> <tr> <td>Consideration of ethics which is detailed and directly relevant to the investigation. (Two or more points which are detailed.)</td> <td>9–10</td> </tr> </table>	No comment on ethics.	0	Comment given but muddled and weak.	1–2	Consideration of ethics but not specific to investigation <b>OR</b> Consideration of ethics but is simplistic and brief but specific to investigation.	3–4	Consideration of ethics is simplistic but specific to investigation. May include one detailed point.	5–6	Consideration of ethics which is good but brief and specific to investigation. (Two or more points in some detail.)	7–8	Consideration of ethics which is detailed and directly relevant to the investigation. (Two or more points which are detailed.)	9–10	10
No comment on ethics.	0													
Comment given but muddled and weak.	1–2													
Consideration of ethics but not specific to investigation <b>OR</b> Consideration of ethics but is simplistic and brief but specific to investigation.	3–4													
Consideration of ethics is simplistic but specific to investigation. May include one detailed point.	5–6													
Consideration of ethics which is good but brief and specific to investigation. (Two or more points in some detail.)	7–8													
Consideration of ethics which is detailed and directly relevant to the investigation. (Two or more points which are detailed.)	9–10													

Question	Answer	Marks
3(a)	<p><b>Outline what is meant by ‘qualitative data’.</b></p> <p>1 mark partial, 2 marks full.</p> <p>Example answer – Descriptive results = 1 mark. Words = 1 mark Results that are collected through open questions which give descriptive responses. = 2 marks</p> <p>No credit given for describing what qualitative data is not (e.g. numerical data).</p>	2

Question	Answer	Marks												
<p><b>Using the studies from the list below, answer the questions which follow:</b></p> <p><b>Rosenhan (sane in insane places)</b>  <b>Thigpen and Cleckley (multiple personality disorder)</b>  <b>Dement and Kleitman (sleep and dreaming)</b></p>														
3(b)	<p><b>Describe how the qualitative data were collected in each of these studies.</b></p> <p><b>Indicative content:</b> Most likely answers (any appropriate answer receives credit):</p> <p><b>Rosenhan:</b> Investigated diagnosis of mental health. Diagnoses of the pseudopatients were recorded. While in the hospitals, pseudopatients wrote in their diaries about the behaviour witnessed of both staff and patients in the hospitals. They recorded the behaviour of the staff and patients. Accept any appropriate behaviour described such as the treatment of other patients by staff, the comments made to the pseudopatients during their stay (e.g. Nervous Mr X), description of events that led up to the diagnosis of oral acquisitive syndrome, etc.</p> <p><b>Thigpen and Cleckley:</b> Data collected via interviews and hypnosis with Eve as well as her family. Any relevant description of Eve’s behaviour from the study. Behaviour/experiences as a child and also as an adult with her family. Description of getting lost in the woods, the shopping trip, behaviour during sessions as well as with outside therapist, personality via ink blot test and human figures test, etc.</p> <p><b>Dement and Kleitman:</b> Participants woken at various points in the night in both REM and NREM sleep and asked for the content of their dream. In addition, the researchers noted the direction of eye movement and analysed whether this correlated with the content of the dream.</p> <table border="1" data-bbox="320 1355 1310 1910"> <thead> <tr> <th colspan="2" data-bbox="320 1355 1310 1420"><b>For each study</b></th> </tr> </thead> <tbody> <tr> <td data-bbox="320 1420 1214 1485">No answer or incorrect answer.</td> <td data-bbox="1214 1420 1310 1485"><b>0</b></td> </tr> <tr> <td data-bbox="320 1485 1214 1619">Identification of point relevant to question but not related to study or comment from study but no point about qualitative data from the study. The description may be very brief or muddled.</td> <td data-bbox="1214 1485 1310 1619"><b>1</b></td> </tr> <tr> <td data-bbox="320 1619 1214 1715">Description of point about qualitative data from the study. A clear description that may lack some detail.</td> <td data-bbox="1214 1619 1310 1715"><b>2</b></td> </tr> <tr> <td data-bbox="320 1715 1214 1850">As above but with analysis (comment with comprehension) about qualitative data from the study. A clear description that is in sufficient detail.</td> <td data-bbox="1214 1715 1310 1850"><b>3</b></td> </tr> <tr> <td data-bbox="320 1850 1214 1910">Max mark</td> <td data-bbox="1214 1850 1310 1910"><b>9</b></td> </tr> </tbody> </table>	<b>For each study</b>		No answer or incorrect answer.	<b>0</b>	Identification of point relevant to question but not related to study or comment from study but no point about qualitative data from the study. The description may be very brief or muddled.	<b>1</b>	Description of point about qualitative data from the study. A clear description that may lack some detail.	<b>2</b>	As above but with analysis (comment with comprehension) about qualitative data from the study. A clear description that is in sufficient detail.	<b>3</b>	Max mark	<b>9</b>	<b>9</b>
<b>For each study</b>														
No answer or incorrect answer.	<b>0</b>													
Identification of point relevant to question but not related to study or comment from study but no point about qualitative data from the study. The description may be very brief or muddled.	<b>1</b>													
Description of point about qualitative data from the study. A clear description that may lack some detail.	<b>2</b>													
As above but with analysis (comment with comprehension) about qualitative data from the study. A clear description that is in sufficient detail.	<b>3</b>													
Max mark	<b>9</b>													

Question	Answer	Marks												
3(c)	<p><b>What are the strengths of collecting qualitative data?</b></p> <p>Emphasis on strength. Answers supported with named (or other) studies. Each advantage does not need a different study; can use same study.</p> <p>Indicative content: Detailed data Usefulness of data Holistic Explanatory power. Can be ethical research as due to extensive nature of study the participant realises they are in a study. Due to in-depth nature of study the researcher builds up a close relationship with the participant and this can lead to more valid findings.</p> <p>Any other appropriate strength.</p> <table border="1" data-bbox="320 819 1310 1312"> <thead> <tr> <th colspan="2" data-bbox="320 819 1217 884"><b>Marks per point up to a MAXIMUM of three points.</b></th> </tr> </thead> <tbody> <tr> <td data-bbox="320 884 1217 949">No answer or incorrect answer.</td> <td data-bbox="1217 884 1310 949"><b>0</b></td> </tr> <tr> <td data-bbox="320 949 1217 1014">Identification of strength.</td> <td data-bbox="1217 949 1310 1014"><b>1</b></td> </tr> <tr> <td data-bbox="320 1014 1217 1149">Description of strength related to collecting qualitative data <b>OR</b> a weak description of strength related to collecting qualitative data and applied to a study.</td> <td data-bbox="1217 1014 1310 1149"><b>2</b></td> </tr> <tr> <td data-bbox="320 1149 1217 1245">Description of strength related to collecting qualitative data and applied to the study effectively.</td> <td data-bbox="1217 1149 1310 1245"><b>3</b></td> </tr> <tr> <td data-bbox="320 1245 1217 1312"><b>Max mark</b></td> <td data-bbox="1217 1245 1310 1312"><b>9</b></td> </tr> </tbody> </table>	<b>Marks per point up to a MAXIMUM of three points.</b>		No answer or incorrect answer.	<b>0</b>	Identification of strength.	<b>1</b>	Description of strength related to collecting qualitative data <b>OR</b> a weak description of strength related to collecting qualitative data and applied to a study.	<b>2</b>	Description of strength related to collecting qualitative data and applied to the study effectively.	<b>3</b>	<b>Max mark</b>	<b>9</b>	<b>9</b>
<b>Marks per point up to a MAXIMUM of three points.</b>														
No answer or incorrect answer.	<b>0</b>													
Identification of strength.	<b>1</b>													
Description of strength related to collecting qualitative data <b>OR</b> a weak description of strength related to collecting qualitative data and applied to a study.	<b>2</b>													
Description of strength related to collecting qualitative data and applied to the study effectively.	<b>3</b>													
<b>Max mark</b>	<b>9</b>													

Question	Answer	Marks
4(a)	<p><b>Outline what is meant by the term ‘ethnocentric bias’ in psychology.</b></p> <p>1 mark partial, 2 marks full.</p> <p>A distortion caused by a focus on the researcher’s own culture which narrows the appropriateness of the methods when used with participants from other cultures and causes a lack of generalisability of the finding to other cultures.</p> <p>Accept a discussion about the ethnocentric nature of psychological materials.</p> <p>Where the study uses a limited group of Ps and the results cannot be generalised to the wider population. – 1 mark</p> <p>Where the researcher focuses on his own culture and is therefore unable to generalise his findings to other cultures. – 2 marks</p>	<b>2</b>

Question	Answer	Marks												
<p><b>Using the studies from the list below, answer the questions which follow:</b></p> <p><b>Piliavin et al. (subway Samaritans)</b>  <b>Baron-Cohen et al. (eyes test)</b>  <b>Tajfel (intergroup categorisation)</b></p>														
4(b)	<p><b>Describe how the data were collected in each of these studies.</b></p> <p><b>Piliavin et al.:</b> Data were collected by two independent female observers who sat in the adjacent area. They noted the number, gender and race of all passengers in the carriage. They noted the characteristics of who helped and how long it took before anyone helped. They also wrote down any comments made by participants during the study about the incident.</p> <p><b>Baron-Cohen:</b> Group 1 (autistic/AS participants) and Group 4 (IQ matched controls) were given the short WAIS-R. This was to show that lack of advanced theory of mind is unconnected to IQ. Participants (Group 1 – Autistic/AS, Group 3 – Students and Group 4 – IQ matched controls) were also given the AQ test (Autistic Spectrum Quotient) to show the level of autism in these groups. Eyes test and gender test.</p> <p><b>Tajfel:</b> Participants completed matrices of rewards of points to both in-group and out-group members (study 1). This was done after participants were told which group they belonged to (over-/under-estimator and Klee/Kandinsky). The matrices were called a reward and punishment matrix. The boys awarded points on the basis of maximum joint profit, maximum in-group profit and maximum difference (study 2).</p> <table border="1" data-bbox="320 1184 1310 1711"> <thead> <tr> <th colspan="2" data-bbox="320 1184 1310 1249"><b>For each study</b></th> </tr> </thead> <tbody> <tr> <td data-bbox="320 1249 1203 1317">No answer or incorrect answer.</td> <td data-bbox="1203 1249 1310 1317"><b>0</b></td> </tr> <tr> <td data-bbox="320 1317 1203 1451">Identification of point relevant to question but not related to study or comment from study but no point about data collection. Question	Answer	Marks												
4(c)	<p><b>What difficulties may psychologists have when they carry out research in one country/culture?</b></p> <p>Emphasis on difficulty. Answers supported with named (or other) studies. Each problem does not need a different study; can use same study.</p> <p>Indicative content:            Difficult to find a generalisable sample.            Lowers validity of data collection method/findings            Researchers don't realise procedures are either irrelevant or impossible to complete by the participants in a particular culture.            Experimenter bias in interpretation of the data            Leading questions</p> <table border="1" data-bbox="320 719 1310 1205"> <thead> <tr> <th data-bbox="320 719 1209 784"><b>Marks per point up to a MAXIMUM of three points.</b></th> <th data-bbox="1209 719 1310 784"></th> </tr> </thead> <tbody> <tr> <td data-bbox="320 784 1209 848">No answer or incorrect answer.</td> <td data-bbox="1209 784 1310 848"><b>0</b></td> </tr> <tr> <td data-bbox="320 848 1209 913">Identification of difficulty.</td> <td data-bbox="1209 848 1310 913"><b>1</b></td> </tr> <tr> <td data-bbox="320 913 1209 1046">Description of difficulty related to carrying out research in one country/culture <b>OR</b> a weak description of a difficulty related to one country/culture and applied to a study.</td> <td data-bbox="1209 913 1310 1046"><b>2</b></td> </tr> <tr> <td data-bbox="320 1046 1209 1144">Description of difficulty related to one country/culture and applied to the study effectively.</td> <td data-bbox="1209 1046 1310 1144"><b>3</b></td> </tr> <tr> <td data-bbox="320 1144 1209 1205"><b>Max mark</b></td> <td data-bbox="1209 1144 1310 1205"><b>9</b></td> </tr> </tbody> </table>	<b>Marks per point up to a MAXIMUM of three points.</b>		No answer or incorrect answer.	<b>0</b>	Identification of difficulty.	<b>1</b>	Description of difficulty related to carrying out research in one country/culture <b>OR</b> a weak description of a difficulty related to one country/culture and applied to a study.	<b>2</b>	Description of difficulty related to one country/culture and applied to the study effectively.	<b>3</b>	<b>Max mark</b>	<b>9</b>	<b>9</b>
<b>Marks per point up to a MAXIMUM of three points.</b>														
No answer or incorrect answer.	<b>0</b>													
Identification of difficulty.	<b>1</b>													
Description of difficulty related to carrying out research in one country/culture <b>OR</b> a weak description of a difficulty related to one country/culture and applied to a study.	<b>2</b>													
Description of difficulty related to one country/culture and applied to the study effectively.	<b>3</b>													
<b>Max mark</b>	<b>9</b>
