Paper 4 Applied Reasoning

**October/November 2018**

MARK SCHEME

Maximum Mark: 50

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **12** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
4	<p data-bbox="336 215 1086 247"><b>‘All schools should have compulsory school uniform.’</b></p> <p data-bbox="336 279 716 311"><b><i>Specimen Level 4 Answers</i></b></p> <p data-bbox="336 343 604 375"><i>Support (776 words)</i></p> <p data-bbox="336 414 1792 446">The information presented in the documents favours the introduction of compulsory school uniform in all schools.</p> <p data-bbox="336 486 1926 758">Document 2 lists many reasons why it feels school uniforms are desirable. It is true that many of the points have some overlap and the authors are likely to have constructed the list from the standpoint of trying to promote the benefits of uniform. However, the list is extensive and many of the points are still valid. For example, the points about the ethos of the school, common identity and team spirit could all be regarded as the same but they do reflect modern, and perhaps historical, business practice. Most successful companies insist that their employees wear corporate uniform. The reasons for this are likely to be similar to those listed in Doc 2 and are likely to be based on experience that, for whatever micro-reasons, staff uniforms increase long-term performance of the company. Schools and businesses are not identical but they share enough similarities for us to infer that uniforms in schools are likely to improve long term performance.</p> <p data-bbox="336 790 1926 1061">Documents 1 and 2 occupy positions on either side of the debate and both are unquestionably biased in their tone. Document 2 is firmly in favour of compulsory school uniforms and Doc 1 is firmly against. Doc 2 has, presumably, been written by a senior member of staff who, presumably, has a genuine desire to see the school and its students perform well. It is likely that the author of Doc 2 also has access to some information about the relative merits of uniforms in schools. Doc 1, on the other hand is written by a senior student who, whilst presumably intelligent and articulate, probably lacks knowledge and expertise on the subject and, although this is speculation, probably cares less about the academic success of the other students and more about the potential kudos among fellow students of having helped rid them of a disliked uniform. Thus Doc 2 should be taken more seriously than Doc 1.</p> <p data-bbox="336 1093 1937 1268">The counter-positions in Doc 1 are weak. Doc 1 mentions the time spent on enforcing uniform policy and this is corroborated by Doc 2. However, this assumes that the absence of a uniform would not create other issues that would take up as much teacher time. For example, if there is no official uniform, some students will attempt to attend school wearing clothing with obscene or offensive writing or insignia. This could, and perhaps would, take up as much time as dealing with minor uniform infringements.</p>	30

<b>Question</b>	<b>Answer</b>	<b>Marks</b>
4	<p>Doc 1 also raises the issue of cost. Despite the author's self-contradiction on the subject it is an issue worth mentioning. Doc 3 shows at least 1 school in which uniform must be sourced from a particular supplier. Doc 5, if true, shows that, where a single supplier is identified, prices could be high. However, Doc 3 also states that help is available for families who would genuinely struggle with uniform costs. Furthermore, the graph in Doc 5 also shows that much less expensive alternatives are available. Thus it is possible to have a compulsory uniform without its having to be purchased from a single supplier.</p> <p>Doc 4 provides the strongest evidence in favour of uniforms. Although the data is only from the US, the US is large and the data appear to come from geographical extremes of the country. It is possible that the apparent benefits for uniform introduction were due to a range of factors introduced at the same time but, as there is not much other information to go on, we should at least consider this possibility. Despite the political appeal to fear from the Mayor the numbers themselves are verifiable and, at least one of the pieces of information comes from a respected academic publication, which presumably means the research was peer-reviewed by experts. The point about a reduction in gang insignia in the US is corroborated, albeit to a limited extent, by the dress code in a school in Doc 3.</p> <p>For the reasons stated above, it seems that school uniforms are desirable. If they are desirable they need to be compulsory. There is no point having a voluntary uniform – that would be something of a contradiction in terms.</p> <p>If schools uniforms are desirable in some schools, as seems likely, then they are probably desirable in most. The information in the documents comes from at least 2 countries, US and Australia, which implies that conclusions about schools might be generalisable. There may be some schools whose circumstances are so exceptional that uniform is not appropriate for them. However, with a very few exceptions, all schools should have a compulsory school uniform.</p> <p><i>Challenge (691 words)</i></p> <p>The information presented in the documents does not support compulsory school uniform in all schools.</p> <p>Documents 1 and 2 occupy positions on either side of the debate and both are unquestionably biased in their tone. Document 2 is firmly in favour of compulsory school uniforms and Doc 1 is firmly against. Both documents are weak but Doc 1 at least offers some reasoning to support its points.</p> <p>Document 2 appears to list many reasons why it feels school uniforms are desirable. However, many of the points are simply repeated, albeit worded differently. The author is likely to have constructed the list from the standpoint of trying to promote the benefits of uniform as part of his or her job description and many of the points themselves are vague and unverifiable.</p>

Question	Answer	Marks
4	<p>Doc 1, on the other hand is written by a senior student. While this person may lack experience they have some ability to perceive the feelings of their fellow students. The data from the student survey is not strong on its own but it is strengthened by corroboration with the Australian data in Doc 5 – students do not appear to like maroon uniforms. Data from student questionnaire surveys are notoriously weak. However, as the issue is about student happiness and something that affects their everyday lives – school uniform – these data can be treated with a little more confidence than usual.</p> <p>No uniform means more time for learning. School uniform does create unnecessary conflict between student and teacher. Doc 1 mentions the time spent on enforcing uniform policy and this is corroborated by Doc 2. The absence of a uniform might occasionally create other issues but these are likely to be much less frequent. Furthermore, if there is a uniform, someone, usually a teacher, needs to write the policy, contact parents, contact suppliers etc. All of this takes time away from teaching and learning.</p> <p>Doc 1 also raises the issue of cost. Despite the author’s self-contradiction on the subject, it is an issue worth mentioning. Doc 3 shows at least 1 school in which uniform must be sourced from a particular supplier. Doc 5, if true, shows that, where a single supplier is identified, prices could be high. Doc 3 does state that help is available for families who would genuinely struggle with uniform costs but the administration of such a policy is again time-consuming for the school and likely to be unpopular with families that have to prove to the school that they are poor enough to receive help. Although Doc 5 also shows that less expensive alternatives are available, many schools would, and do, insist on a single supplier and such a system is open to corruption.</p> <p>Doc 4, which appears to provide the strongest evidence in favour of uniforms, is flawed. The Mayor appeals to public fear with a quote about sons and daughters being victims of crime. More importantly, the data is only from the US, so cannot be generalised to the rest of the world. Furthermore the apparent benefits for uniform introduction could easily be due to a range of other factors introduced at the same time – to claim otherwise is a <i>cum hoc</i> fallacy.</p> <p>What is lacking from any of the documents is any verifiable information about the effect of uniforms on school success. Even Doc 2, whose primary purpose is to promote uniforms, does not mention any such data. If such data exists it would seem an obvious thing to include in a policy document explaining, to parents and students, the benefits of school uniforms.</p> <p>Compulsory school uniforms are an infringement of personal freedom and stifle creativity. Both of these points are made by Doc 1 but are still valid despite the document’s weaknesses. Moreover, both points are acknowledged by the pro-uniform Doc 2. The case for uniforms has not been proven by Doc 2 or any of the other documents. In a situation in which personal freedom is being restricted, the burden of proof must be upon those who seek to restrict the freedom of others. As this burden has not been met, we must conclude that all schools should not have compulsory school uniforms.</p>
