Paper 5 Practical Test

May/June 2022

CONFIDENTIAL INSTRUCTIONS

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

INSTRUCTIONS

- If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.

This document has **8** pages. Any blank pages are indicated.

General information about practical exams

Centres must follow the guidance on science practical exams given in the *Cambridge Handbook*.

Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

C	corrosive	MH	moderate hazard
HH	health hazard	T	acutely toxic
F	flammable	O	oxidising
N	hazardous to the aquatic environment		

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor **must** perform the experiments and record the results as instructed. This must be done **out of sight** of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.

Specific information for this practical exam

During the exam, the supervisor (**not** the invigilator) must do the experiment in Question 1 and record the results on a spare copy of the question paper, clearly labelled 'supervisor's results'.

Question 1

Each candidate should be provided with:

hazard	materials and apparatus	quantity per candidate
	dialysis tubing bags, covered with distilled water in a beaker labelled D	2 dialysis tubing bags in 1 beaker
	distilled water in a small beaker labelled W	100 cm ³
	1% vitamin C solution in a small beaker labelled V	30 cm ³
	1% DCPIP solution in a small beaker labelled DCPIP	30 cm ³
	large test-tubes	2
	standard test-tubes	2
	test-tube rack to hold two large and two standard test-tubes	1
	empty 250 cm ³ beaker labelled hot water	1
	supply of hot water at 40–50 °C Candidates will raise their hand when they are ready for hot water.	approximately 200 cm ³
	250 cm ³ beaker half-filled with water at room temperature or approximately 20 °C, labelled cold water	1
	empty small beakers	2
	10 cm ³ syringes	2
	1 cm ³ syringes	2
	thermometer, –10 °C to +110 °C at 1 °C graduations	1
	elastic bands	2
	beaker or container labelled waste	1
	permanent marker pen	1
	stop-clock	1
	paper towels	5
	ruler, with a mm scale (also required for Question 2)	1
	gloves	1 pair
	suitable eye protection	1

Preparation of materials

dialysis tubing bags, D

A 20 cm length of dialysis (Visking) tubing should be soaked for a few minutes in distilled water and then tied with a tight knot approximately 1 cm from one end, to form a bag. Candidates will require two dialysis tubing bags each. These should be presented to candidates in a beaker which contains enough distilled water to cover the dialysis tubing bags. The beaker should be labelled **D**.

1% vitamin C solution, V

This should be prepared by dissolving 1 g of vitamin C (ascorbic acid) in 80 cm³ of distilled water and making up to 100 cm³ with more distilled water.

1% DCPIP solution, DCPIP

This should be prepared by dissolving 1 g of DCPIP (2,6-dichlorophenolindophenol) **[HH] [MH] [N]** in 80 cm³ of distilled water and making up to 100 cm³ with more distilled water. The DCPIP is difficult to dissolve and should be prepared the day before the exam and stirred well. It must be filtered using standard grade filter paper (such as Whatman grade 1) to remove any undissolved DCPIP before use.

Supervisor's report

Syllabus and component number

				/		
--	--	--	--	---	--	--

Centre number

--	--	--	--	--

Centre name

Time of the practical session

Laboratory name/number

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

Declaration

- 1 Each packet that I am returning to Cambridge International contains all of the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor’s results relevant to these candidates
 - the supervisor’s reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.
- 2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor’s results, supervisor’s reports and seating plans with the time and laboratory name/number for each practical session.
- 3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.
- 4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a *special consideration form*.
