Paper 1

March 2019

MARK SCHEME

Maximum Mark: 50

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer		Marks
1(a)	File size	Tick (✓)	1
	20 MB		
	10 GB	✓	
1(b)	File size	Tick (✓)	1
	3500 kB	✓	
	3 MB		

Question	Answer	Marks
2(a)(i)	– (A device that allows) data to be entered (into a computer system)	1
2(a)(ii)	One from e.g.: – Keyboard – Mouse – Microphone – Sensor – Touch screen	1
2(b)(i)	– (A device that allows the user to) view/hear the data (that has been entered into a computer system)	1
2(b)(ii)	One from e.g. : – Monitor – Speaker – Headphones – Printer	1

Question	Answer	Marks
3(a)(i)	– 000000100111 └──┬──┘ └──┬──┘ 1 mark 1 mark	2
3(a)(ii)	– 000101011110 └──┬──┘ └──┬──┘ 1 mark 1 mark	2
3(a)(iii)	1 mark for working, 1 mark for correct answer – 1024 + 512 + 128 + 64 + 4 + 2 + 1 – 1735	2
3(b)(i)	Two from: – Pressure sensor – Light sensor – Motion sensor – Magnetic field (can be used if competitors are wearing a compatible chip)	2
3(b)(ii)	– Sensor sends signal to microprocessor – Signal is analogue and is converted to digital (using ADC) – Data is compared to stored value // Check for signal – If data does not match / is out of range/ in range // signal detected ... – ... counter is incremented by 1 – Continuous process	6

Question	Answer	Marks																		
4(a)	<p>Two from:</p> <ul style="list-style-type: none"> – Closer to English statements / human language – Easier / quicker to write / read / understand / remember – Easier / quicker to debug – Less likely to make errors – One line of code can carry out multiple commands – Portable language 	2																		
4(b)	<p>1 mark for correct tick(s) for each statement</p> <table border="1" data-bbox="443 563 1832 959" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th data-bbox="443 563 1500 628">Statement</th> <th data-bbox="1500 563 1655 628">Compiler</th> <th data-bbox="1655 563 1832 628">Interpreter</th> </tr> </thead> <tbody> <tr> <td data-bbox="443 628 1500 694">A report of errors is produced at the end of translation</td> <td data-bbox="1500 628 1655 694" style="text-align: center;">✓</td> <td data-bbox="1655 628 1832 694"></td> </tr> <tr> <td data-bbox="443 694 1500 759">The program is translated one line at a time</td> <td data-bbox="1500 694 1655 759"></td> <td data-bbox="1655 694 1832 759" style="text-align: center;">✓</td> </tr> <tr> <td data-bbox="443 759 1500 825">The program is translated from high-level language into machine code</td> <td data-bbox="1500 759 1655 825" style="text-align: center;">✓</td> <td data-bbox="1655 759 1832 825" style="text-align: center;">✓</td> </tr> <tr> <td data-bbox="443 825 1500 890">An executable file is produced</td> <td data-bbox="1500 825 1655 890" style="text-align: center;">✓</td> <td data-bbox="1655 825 1832 890"></td> </tr> <tr> <td data-bbox="443 890 1500 956">The program will not run at all if an error is detected</td> <td data-bbox="1500 890 1655 956" style="text-align: center;">✓</td> <td data-bbox="1655 890 1832 956"></td> </tr> </tbody> </table>	Statement	Compiler	Interpreter	A report of errors is produced at the end of translation	✓		The program is translated one line at a time		✓	The program is translated from high-level language into machine code	✓	✓	An executable file is produced	✓		The program will not run at all if an error is detected	✓		5
Statement	Compiler	Interpreter																		
A report of errors is produced at the end of translation	✓																			
The program is translated one line at a time		✓																		
The program is translated from high-level language into machine code	✓	✓																		
An executable file is produced	✓																			
The program will not run at all if an error is detected	✓																			
4(c)	<ul style="list-style-type: none"> – Lossy would remove data – Lossless does not remove data // No data can be lost ... – Can be restored to original state ... – ... otherwise will not run / work correctly 	4																		
4(d)(i)	<ul style="list-style-type: none"> – Sending device creates value from calculation on data // By example – Value is transmitted with the data – Receiving device performs same calculation – Values are compared after transmission // If values do not match ... – ... an error is detected 	5																		

Question	Answer	Marks
4d(ii)	<ul style="list-style-type: none"> – Parity check – Check digit – Automatic repeat request 	3

Question	Answer	Marks
5(a)	<p>1 mark for each correct logic gate with correct input(s)</p> 	6

Question	Answer	Marks																																													
5(b)	<p>4 marks for 8 correct outputs 3 marks for 6/7 correct outputs 2 marks for 4/5 correct outputs 1 mark for 2/3 correct outputs</p> <table border="1" data-bbox="618 384 1655 975"> <thead> <tr> <th data-bbox="618 384 714 451">A</th> <th data-bbox="714 384 810 451">B</th> <th data-bbox="810 384 907 451">C</th> <th data-bbox="907 384 1579 451">Working space</th> <th data-bbox="1579 384 1655 451">X</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>0</td> <td>0</td> <td></td> <td>0</td> </tr> <tr> <td>0</td> <td>0</td> <td>1</td> <td></td> <td>0</td> </tr> <tr> <td>0</td> <td>1</td> <td>0</td> <td></td> <td>1</td> </tr> <tr> <td>0</td> <td>1</td> <td>1</td> <td></td> <td>0</td> </tr> <tr> <td>1</td> <td>0</td> <td>0</td> <td></td> <td>0</td> </tr> <tr> <td>1</td> <td>0</td> <td>1</td> <td></td> <td>1</td> </tr> <tr> <td>1</td> <td>1</td> <td>0</td> <td></td> <td>1</td> </tr> <tr> <td>1</td> <td>1</td> <td>1</td> <td></td> <td>1</td> </tr> </tbody> </table>	A	B	C	Working space	X	0	0	0		0	0	0	1		0	0	1	0		1	0	1	1		0	1	0	0		0	1	0	1		1	1	1	0		1	1	1	1		1	4

1	0	1		1																																											
1	1	0		1																																											
1	1	1		1																																											

Question	Answer	Marks
6(a)	<p>Three from:</p> <ul style="list-style-type: none"> – Universal Serial Bus – Data transmission method – Uses serial transmission // bits of data are sent one at a time – Universal standard // common interface 	3
6(b)(i)	– Laser printer	1

Question	Answer	Marks																								
6(b)(ii)	Two from: <ul style="list-style-type: none"> – Cheaper printing cost per page – It prints at a faster speed – It prints text at a high quality – Colour fast 	2																								
6(b)(iii)	One from: <ul style="list-style-type: none"> – Expensive to purchase printer – Toner is expensive – Print images at a lower quality – Can be quite large in size 	1																								
6(c)(i)	1 mark per each correct tick <table border="1" data-bbox="591 699 1684 1094" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th data-bbox="591 699 1120 767">Storage example</th> <th data-bbox="1120 699 1308 767">Primary</th> <th data-bbox="1308 699 1496 767">Secondary</th> <th data-bbox="1496 699 1684 767">Off-line</th> </tr> </thead> <tbody> <tr> <td data-bbox="591 767 1120 836">Solid state drive (SSD)</td> <td data-bbox="1120 767 1308 836"></td> <td data-bbox="1308 767 1496 836" style="text-align: center;">✓</td> <td data-bbox="1496 767 1684 836"></td> </tr> <tr> <td data-bbox="591 836 1120 904">Blu-ray disc</td> <td data-bbox="1120 836 1308 904"></td> <td data-bbox="1308 836 1496 904"></td> <td data-bbox="1496 836 1684 904" style="text-align: center;">✓</td> </tr> <tr> <td data-bbox="591 904 1120 973">USB flash memory</td> <td data-bbox="1120 904 1308 973"></td> <td data-bbox="1308 904 1496 973"></td> <td data-bbox="1496 904 1684 973" style="text-align: center;">✓</td> </tr> <tr> <td data-bbox="591 973 1120 1042">Random access memory (RAM)</td> <td data-bbox="1120 973 1308 1042" style="text-align: center;">✓</td> <td data-bbox="1308 973 1496 1042"></td> <td data-bbox="1496 973 1684 1042"></td> </tr> <tr> <td data-bbox="591 1042 1120 1094">Read only memory (ROM)</td> <td data-bbox="1120 1042 1308 1094" style="text-align: center;">✓</td> <td data-bbox="1308 1042 1496 1094"></td> <td data-bbox="1496 1042 1684 1094"></td> </tr> </tbody> </table>	Storage example	Primary	Secondary	Off-line	Solid state drive (SSD)		✓		Blu-ray disc			✓	USB flash memory			✓	Random access memory (RAM)	✓			Read only memory (ROM)	✓			5
Storage example	Primary	Secondary	Off-line																							
Solid state drive (SSD)		✓																								
Blu-ray disc			✓																							
USB flash memory			✓																							
Random access memory (RAM)	✓																									
Read only memory (ROM)	✓																									

Question	Answer	Marks
6(c)(ii)	<p>Six from:</p> <ul style="list-style-type: none"> – Storage device has platters – Platters/disk divided into tracks – Storage platter / disk is spun – Has a read/write arm that moves across storage media – Read/writes data using electromagnets – Uses magnetic fields to control magnetic dots of data – Magnetic field determines binary value <p>NOTE: Marks can be awarded for an alternative description e.g. magnetic tape</p>	6
6(c)(iii)	<ul style="list-style-type: none"> – Magnetic is cheaper per unit of data – Magnetic has more longevity // Magnetic can perform more read/write cycles 	2

Question	Answer	Marks
7	<p>For each of three risks Naming the risk – 1 mark, describing the risk – 1 mark:</p> <ul style="list-style-type: none"> – Hacking ... – ... when a person tries to gain unauthorised access to a computer system – ... data can be deleted/corrupted by hacker – Malware ... – ... a software program designed to damage data / disrupt the computer system – ... replicates itself and fills the hard disk – Virus ... – ... a program that replicates itself to damage / delete files <p>NOTE: Multiple kinds of malware can be awarded if listed and given a matching description e.g. trojan horse, worm.</p>	6
