## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

## MARK SCHEME for the May/June 2006 question paper

## 0680 ENVIRONMENTAL MANAGEMENT

0680/04

Paper 4, maximum raw mark 60

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

The minimum marks in these components needed for various grades were previously published with these mark schemes, but are now instead included in the Report on the Examination for this session.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2006 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 1		e 1	Mark Scheme	Syllabus	Paper		
			IGCSE – May/June 2006	0680	04		
(a)	hot	all yea	r; many windy days; so evaporation rapid/speeded up/e	eq;		[3]	
(b)	they grov	/ carr w/provi	y out photosynthesis; which makes food/organic r ide food for consumers;	nolecules	for algae	∍ to <b>[2</b> ]	
(c)	ene bod	energy lost /respiration loses energy; so only some food turned into consumer bodies/biomass; not enough to support more than two feeding levels; AVP; [2]					
(d)	(i)	sustai	nable, salt water never runs out; process is solar	powered;	no signifi	cant	
	(ii)	conse whilst	ervation, not many habitats for wading birds left; food of evaporation goes on; AVP;	chain can	be mainta [ma	ined Ix 3]	
(a)	con	control building; build sewage treatment works; AVP; [2]					
(b)	(i)	any th leave	ree valid points, such as no litter; do not kill fish; do not take coral away; report a	ny damag	e; AVP;;	[3]	
	(ii)	12;				[1]	
	(iii)	4 sho AVP;	re and dive only, 4 boat shore and dive only; 4 boat	shore dive	e and sno [ma	rkel; <b>1x 3]</b>	
(c)	(i)	nearly just hi	<ul> <li>all boat access have higher % damage; highest sho gher than lowest boat damage 3.0%;</li> </ul>	re damage	e 3.1% is	only [ <b>2</b> ]	
	(ii)	more	dives in total, explained; anchors do damage; boats hitting	shallow co	orals; AVP;	; <b>[3]</b>	
	(iii)	3-10;	need for repetition to make findings more reliable/ref to	means;		[2]	
(d)	(i)	canno specif	ot be exactly repeated; survey of only one post no ïed; no undamaged corals recorded;	t enough;	no distar [ma	າces ເx 3]	
	(ii)	correc	ct orientation; length; all three posts;			[3]	
	(iii)	135, 1	50;			[1]	
	(iv)	15/15	0 x 100 = 10 (%); allow error from part <b>(iii)</b>			[1]	
(e)	more damage/twice as much damage; around every post; AVP;					[2]	
(f)	numbers of dives/divers at each survey;					[1]	
(g)	some mention of all three aspects to score max 6 valid points;;;;;; [6						
(a)	increased number of leaves; but reduced length; shorter plants less exposed to evaporation by wind; AVP; [3]						
(b)	(i)	8 m o	n scale;			[1]	
	(ii)	east-v	vest line drawn;			[1]	
	(iii)	orient axes l plot le	ation; abelled; aves;			F 41	
		plot le	engtn;			[4]
