May/June 2022

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2022 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **17** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Task 2 - Step 14 – Printout 1

Name, centre number, candidate number

Tawara Adriatic Marine

Edited by: Candidate Name

We are a large company operating a chain of 9 marinas in the Adriatic region. All of our marinas are newly built or recently refurbished. They are well-equipped with modern facilities and offer a full range of services. Our marinas are open all year round and have a total of 980 wet berths and 150 dry berths.

Several of our marinas have been awarded the prestigious Blue Flag. This is an environmental award given annually to marinas that have the highest quality safety and services, environmental education and management. The award confirms that our marinas are amongst the finest in the world.

The Adriatic

All our marinas are located in the Adriatic region which is the northernmost part of the Mediterranean Sea, surrounded by the Apennine Mountains and the Dinaric Alps. It is one of the most beautiful, unspoilt locations in the world. The region shares its west border with Italy, and the east side with Slovenia, Bosnia and Herzegovina, Montenegro, Croatia and Albania. The Adriatic Sea separates Italy and the Balkan Peninsula. It has a total area of 138,600 square kilometres, an average depth of 240 metres and a summer surface temperature of about 28°C. The shallowest parts are found on the northern side and the deepest parts, with an average depth of 1,460 metres, are on the western side.

During the summer months the weather is mostly sunny and settled. Local weather conditions can change quickly and a sudden, strong storm is not uncommon. This is more likely in the northern area

where the weather is more unsettled than in other parts of the Mediterranean. These storms do not last long but a safe harbour or shelter may be necessary for an hour or so until the weather has passed.

The warm climate, calm seas and light winds make the area a sailor's paradise and one of the most popular boating destinations in the Mediterranean. There are over 1300 islands and islets, beautiful beaches and endless shorelines to explore. The crystal blue waters are ideal for snorkelling, swimming and scuba diving. A boating holiday here will exceed your expectations.

Berthing

Berthing in our marinas is stern-to with lazy lines, also known as med-mooring. This provides safer and easier egress from the boat to the pontoon. Our marinas are staffed 24/7 and you must notify them of your approach using VHF Channel 24. They will be on the pontoon to meet you and direct you to a berth. Please follow their instructions. You will be reversing your boat into a narrow space so make sure the sides are well protected with fenders before you start the manoeuvre. The tidal range is very small so the wind will be the only force affecting your approach. It can be helpful if a crew member drops the anchor so you can use the slack on the rope to control your progress as you reverse towards the pontoon. Look out for ropes or anchor chains off the bows of moored boats and take care not to foul them. Once in position lazy lines will be used to secure your boat to the pontoon.

Visiting boats must vacate the marina by 2pm on the day of departure. Late departures up until 6pm can be arranged subject to available space in the marina and is charged at 50% of the daily berth rate. Any boat staying later than 2pm without prior authorisation will be charged a full overnight fee. If a vessel enters the marina in the period from 7am to midnight, the daily berth fee expires at 2pm on the following day. If the vessel enters the marina between midnight and 7am, the daily berth fee expires at 2pm on the same day. After 2pm another daily berth fee will be charged.

Restrictions

The waters are shallow all along the western coast and a number of our marinas are unable to accommodate larger vessels.

Name, centre number, candidate number

Yachts with a length of 25 metres or more are too long for the pontoon berths and must remain at anchor on the breakwater or in the bay outside of the marina. You need to be aware of this if you charter any of the following boats from the 2022 Adriatic fleet:

All walkways and pontoons must be kept clear, tidy and safe at all times. No trailing cables, hoses, mooring ropes, equipment or supplies must be left on the jetties and pontoons. The only exception to this is mobility vehicles.

Amenities

Our marinas are open all year round and offer a wide range of facilities and amenities for visitors to the area. In addition to wet and dry berths you will find:

- boat repair shop
- cash machine (ATM)
- fuel station
- grocery store
- launderette
- reception area
- restaurant, bar and cafe
- rubbish and recycling bins
- WC and showering facilities.

A full service team is based at every marina. They monitor marine traffic and keep a check on moored vessels. The marina office receives daily weather forecasts in English which are the best and most reliable source of weather information. All TAM marinas respond to VHF Channel 24. Other useful numbers include:

The Adriatic summer season runs from May to the end of September. It is best to avoid the peak season period during July and August as the waters become very busy and overcrowded. Marinas can be hard to access and it can be impossible to find a berth. The best time to visit is during the quieter months of May and June when the weather is warm and sunny, the seas are calm and the water temperatures are high enough to swim. Marinas will have plenty of room even in the evening so there will be no rush to get a berth.

Whenever you plan to visit, booking in advance will give you peace of mind. Berths can be reserved by paying in advance via our TAM Mobile App or through the Online Booking service on our website. This offers assistance in English, French, Italian and Spanish. We look forward to welcoming you to one of our marinas.

Prices

All mooring fees are dependent on the size of your vessel. If you are travelling with a catamaran or trimaran prices for the berth will be higher than for a single hull vessel of the same length. A few of our marinas offer berths on the breakwater or in the bay outside the marina which are cheaper than berthing in the marina.

Water and electricity supplies are offered in accordance with the technical capabilities of each marina. The basic berth price includes the use of toilet and shower facilities along with electricity and water consumption for standard boat purposes.

Dry berths use electricity consumption counters which are charged through a prepaid system. Consumption of water for boat washing is charged by boat length. You can visit our marinas for the purpose of refilling your water tanks and you will be charged only a fee for the water taken.

Details of our prices and any service restrictions can be found in the individual price list for each marina.

MOORING DETAILS			
Pontoon:	North	Number:	18
Amount Due:	£5,306.50		

Tawara Marina has 760 berths accommodating sail and motor vessels up to 40 metres in length. Your contract berthing can start at any time to suit your requirements. All berthing is subject to our terms and conditions.

Berthing fee calculations are based on the overall length of space occupied by your vessel. Please note moorings are not transferable and may not be used for any other vessels without the written permission of the Marina Manager.

All boat owners are required to provide proof of insurance. Whilst all reasonable care is taken by Tawara Marina, it is the owner's responsibility to ensure that their vessel is properly secured and protected from the wind and water levels.

Do keep us informed of any change in your contact details. It is important we can contact you quickly if your vessel comes off its mooring. If you are considering changing your vessel please liaise with us so we can advise if your new vessel can be accommodated on your existing mooring.

Participate

Recreational Boats in Europe

Country	Thousands
Sweden	971
Finland	889
Italy	627
United Kingdom	591
Netherlands	556

- 48 million European citizens regularly participate in marine activities
- 36 million are regular participants in boating activities
- over 6 million boats in European waters

Name, centre number, candidate number

Sweden and Finland have the most leisure boats

- Presenter Notes**

 - Participation* slide – presenter notes added, correct position, 100% accurate 1 mark
 - Participation* slide printed as presenter/speaker notes layout 1 mark

- Presentation complete – 6 slides imported, consistent title/bullet layout, no blank slides, no text changed 1 mark
- Master items
- Thick (3–4pt) horizontal line across slide width, about 3cm from top 1 mark
 - Heading 100% accurate, large, black font, top right, not wrapped, above line 1 mark
 - Slide number bottom left | name, centre number, candidate number 1 mark
 - All slides printed as handout with 6 slides to page 1 mark

Support Coastal Tourism

Nautical Tourism in Europe

- A Guide

1

Support Coastal Tourism

Description

- combination of tourism and maritime activity
- water-based activities and land-based facilities supported by services necessary for this segment of tourism
- includes: harbour and marina activities, boat charter, boating activities, boat builders and service trades, hotels, shops and restaurants

2

Support Coastal Tourism

European Facts

- most visited region in the world - market share of 51% in 2020
- more than 70,000 km of coastline
- over 37,000 km of navigable inland waterways
- 23 of the 27 member states have a coastal border
- 10,000 marinas in coastal and inland areas
- over 1 million berths
- Mediterranean Sea attracts 70% of the world charter activity

3

Support Coastal Tourism

Participation

- 48 million European citizens regularly participate in marine activities
- 36 million are regular participants in boating activities
- over 6 million boats in European waters

4

Support Coastal Tourism

Economic Impact

- important income for coastal economies
- sector employs up to 234,000 people
- generates €28 billion in revenue each year
- fastest growing area of the world's tourism industry

5

Support Coastal Tourism

Opportunities

- strong growth in recent years, a trend that is expected to continue
- many of Europe's marinas need refurbishment and modernisation
- regenerating a waterfront refreshes the local economy, creates greater commercial and retail revenue and substantially increases the value of neighbouring areas
- unexploited potential for sustainable growth and job creation
