UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the October/November 2009 question paper for the guidance of teachers

2059 PAKISTAN STUDIES

2059/02

Paper 2 (Environment of Pakistan), maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

1 (a) Study Fig. 1, a temperature graph for Lahore.

(i) Describe the pattern of temperature through the year at Lahore.

[3]

Either – using only the graph rises from January to June slow fall July to September/levels out falls further to December

or – alternative seasonal approach linked to the graph

low in winter + months rising in spring + months falling when monsoon starts + months continues falling in autumn

(ii) Explain why heavy rain falls during the monsoon season.

[3]

moisture-bearing/wet winds/carrying rain from the sea/Bay of Bengal rise over land/hills/mountains cools moisture condenses/clouds form low pressure (over northern Pakistan) brings air in

- (b) Study Fig. 2, rainfall charts for Chitral and Lahore.

 Compare the amounts of rainfall for Chitral and Lahore.
 - A From January to May

B From June to September

[4]

A. January to May (max. 2)

<u>Chitral</u> <u>Lahore</u>

more/higher in C than L high range 35–106 mms/71 mms highest in March/Increase then decreases Jan–May lowest in Jan same pattern at both places less/lower in L than C low range/23–41/18 mms highest in March lowest in April

B. June to Sept (max. 2)

<u>Chitral</u> <u>Lahore</u>

less/lower in C than L more/higher in L than C low range 5–9 mms/4 mms/low highest in Sept/rises June–Sept more/higher in L than C high range/range 62–205 mms highest in July/decreases/July–Sept

Statements must be comparisons, or corresponding in each paragraph.

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(c) (i) In which months do western depressions bring rainfall to Pakistan?

[1]

December - March

(ii) Which of the cities in Fig. 2 receives more rainfall from these western depressions? [1]

Chitral

(iii) Explain why western depressions cause rainfall in Pakistan

[3]

come from Mediterranean(sea) bring moisture/cloud/water cooling causes condensation explanation of cyclonic rainfall can go to 3 marks

(d) Explain how topography and drainage cause problems for farming in Balochistan. [4]

Topography (res.1)

Candidate needs to link these to problems of farming in Baluchistan (i.e. Not the Indus Plain). For example:

lack of fertility, soil erosion, use of machinery, irrigation mountains plateaux steep slopes stony soil thin soil barren land 'mountains/rugged topography unsuitable for farming' max. 1

Drainage (res.1)

Again, candidate needs to link these to problems of farming in Balochistan.

inland drainage basins/salt lakes few/small rivers rivers dry up/evaporate much percolation/loss of water through soil 'lack of water for farming' max. 1

Do not credit' waterlogging and salinity' unless the candidate says 'part of the Indus Plain in Balochistan'.

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(e) Read Fig. 3, an extract from a magazine.

Most farmers in Balochistan do not have access to water from the River Indus.

There are many small rivers that flow into shallow lakes but they are dry for most of the year. These small rivers can provide some water for irrigation.

Other sources of water are underground, and some water flows in tunnels from the mountains.

Irrigation News

Describe the irrigation methods that can be used by farmers in Balochistan and comment on the success of such schemes for increasing farming output. [6]

The candidate is expected to <u>describe</u>, and possibly illustrate at least 2 of the following schemes.

Maximum 4 marks on any one scheme, <u>but 1 mark must comment on 'success'.</u>
Reserve 2 marks for 'success of schemes.
Credit <u>labels</u> on diagrams <u>if not</u> in script.
Allow one named or located example of each scheme.

Karez
canals from rivers/diversion canals
tubewells
wells (primitive)
shaduf to lift water
charsa to lift water
Persian Wheel to lift water
tanks for storage
dams (small)

For Example - The Karez

underground canal/tunnel
uses groundwater
vertical shafts for cleaning
water taken in turn according to shares in ownership
irrigates oases
Example – Quetta-Pishun valley, Mastung valley

Success – less important now, neglected – bad sources drying up – bad lack of government investment – bad

> continuous supply – good only water in the desert – good water from mountains put to good use – good does not evaporate – good etc.

> > [Total: 25]

Page 5	Mark Scheme: Teachers' version	Syllabus	Papei
	GCE O LEVEL – October/November 2009	2059	02

(a) (i) Describe the appearance of this crop.

[2]

tall/medium height not fully grown thin leaves/long leaves/like grass dense/close together good growth because lack of disease/well irrigated

(ii) Explain how the growth of this crop can be improved by

[4]

A irrigation (max. 2)

plants need water to photosynthesis/to be healthy/sugar needs a lot of water makes it grow faster/bigger/higher yield needed in dry periods/drought/make up deficiency in rainfall to remove salinity (in the soil)

B fertilisers (max. 2)

provide minerals for growth/reduces crop failure/nutrients makes up for deficiencies/Pakistan soil deficient in minerals minerals need replacing after cultivation examples of minerals e.g. nitrogen, potash (potassium), phosphate makes it grow faster/bigger/higher yield (but not twice)

(b) Explain how this crop is processed.

[6]

taken to factory/mill
quickly/without delay
washed/scrubbed
crushed
juice collected
refined
crystallised
whitened/made into white sugar
molasses/brown sugar
baggase produced (a waste product)

Study Fig. 4, a graph of sugar cane production.

(c) (i) What was the increase from 1965 to 2005 in:

[2]

A production?

28-29 million tonnes

B yield per hectare?

13–14 tonnes per hectare

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(ii) Name an area of high sugar cane production.

[1]

East-central Punjab/Faisalabad/Sardodha South-central Sindh/Hyderabad/Badin Central NWFP/Charsadda

(d) Study the list of factors which affect agricultural development:

mechanisation land consolidation transport improvements financial loans education telecommunication new seed varieties

(i) Choose three of these factors and for each explain how it increases production of sugar and other agricultural products. [6]

Mechanisation – faster work, more efficient, better preparation, can thresh and harvest, 'does not need to rest', use of tubewells

Land consolidation – bigger fields, more mechanisation

Transport – faster speed e.g. sugar can to the mill prevents losses, dry ports for inputs e.g. fertiliser, experts (advisers) can visit

Loans – funds to buy inputs e.g. fertiliser, machines, bigger fields, purchase more land, better irrigation

Education – knowledge of better methods,

Seed varieties – higher yields, resistance to pests and disease, less water demand, better germination

Telecommunication – access to information, education, skills

No mark for naming the factor.

Reserve one mark for a simple explanation of each factor (3 needed).

Allow a maximum of 4 for one factor.

This list is not exhaustive, and there may be links between the factors.

Do your best for the candidate, but do not credit excessive repetition.

(ii) Explain why it is important to increase the production of sugar and other agricultural products in Pakistan. [4]

increasing population

nutritious/need for better food production

higher incomes (for farmers and businessmen)

increase exports/earn foreign exchange/increase GDP/increase Pakistan's income

reduce imports/improve balance of payments

provides employment in (named industry)

by-products e.g. Bagasse for fuel,

Board for building etc.

[Total: 25]

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

3 Study Fig. 5. A map of Pakistan.

(a) (i) Name the province A.

Balochistan

(ii) Name the river B.

Sutlej

(iii) Name the plateau C.

[3]

[2]

Potwar/Potawar

(b) Name the two main centres of production of surgical instruments D and E.

D Sialkot,

E Lahore

(c) (i) Give two examples of a small scale or cottage industry.

[1]

Two examples of a craft e.g. wood carving, embroidery, jewellery, ornaments etc. sports goods, surgical goods.

(2 names=1 mark – but one must be specific))

(ii) Using your answers to (c) (i) explain what is meant by a small-scale or cottage industry. [4]

small production/small output

traditional skills

in homes/on the street/not in factories

lack of machinery/labour intensive/low technology

women workers/family workers/no hired labour

self-employment/informal industry/less than 10 workers employed/small workforce

low profits

to meet local demand

for tourism

local raw materials

low capital input/fixed assets less than Rs. 10 million

use waste products

see extract provided (p121 Sethi)

Page 8	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(d) Explain how government organisations help and promote the development of small-scale industries. [5]

organisations e.g. PSIC (Pakistan Small Industry Corporation), PSIC (Punjab SIC), SMEDA (small and medium enterprise development agency) etc. marketing facilities/trade fairs/shops technical service centres/expert advice education and training cheap loans/loans on easy instalments tax breaks/cheaper raw materials small industrial estates dry ports/better road transport power supply/electrification/gas/water telecommunications more value – added goods aid mechanisation no reserves for help or promotion

(e) Study Fig. 6, a map of air routes in Pakistan.

(i) Name two major airports in the northern Punjab shown on the map. [2]

two from - Lahore (Alama Iqbal)/Faisalabad/Islamabad (Benazir Bhutto) or Fateh Jang

(ii) Describe the distribution of airways from the northern Punjab. [3]

mostly to the south-west/south to the coast/Karachi follow the Indus plain/through Sindh

a few north and west to NWFP/Peshawar

via Islamabad to Northern Areas/Chitral/Gilgit

west to Quetta

Page 9	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(iii) Explain the advantages and disadvantages of using air transport in the northern Punjab. [5]

Advantages (res. 2)

fast/saves time
over difficult relief/mountains/deserts
where no roads/railways/inaccessible
direct to other countries
businessmen/politicians/tourism
perishable/high value/light goods
more comfortable/less tiring
promotes tourism

Disadvantages (res.2)

bad climate/fog/ice/snow/dangerous expensive unsuitable for perishables/heavy loads/cheap goods (do not double mark) few airports/difficult to build does not go door-to-door/airports may be out of city air pollution/global warming

[Total:25]

- 4 (a) Study Fig. 7, a pie chart showing the sources of energy supply.
 - (i) Name the two largest suppliers of energy.

[1]

oil and gas (2 for 1 mark)

(ii) What percentage of energy comes from oil?

[1]

47-48

(iii) Name two other sources not named on the chart.

[2]

HEP, nuclear, bagasse, solar, wind, geothermal, waves, tidal

(iv) Why does coal only supply 4% of the energy supply in Pakistan?

[3]

low quality/lignite
reserves not developed/not mined
bulky/heavy to transport
used for other things e.g. coke, bricks, cement
coal seams difficult to mine because – thin, contorted, faulted

- (b) Study Fig. 8, a map of Pakistan.
 - (i) Describe the location of the two main oil fields shown on the map.

[2]

Potwar plateau/Northern Punjab Lower Sindh/Southern Sindh

Page 10	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(ii) What is crude oil?

[1]

unrefined/raw/as it comes out of the ground

(iii) Why does Pakistan import most of its oil?

[2]

no enough for demands/not self-sufficient/mall reserves running out lack of investment/development of new fields high cost/lack of money lack of skilled/educated labour

(c) Study Photograph B, a gas extraction unit at Nautheh, in the Potwar Plateau.

(i) With reference to Photograph B explain why natural gas is an easy fuel to extract.

[3]

small size of land little impact on the environment simple machinery/small machinery pipes go into ground works automatically/no/little manpower needed controlled by valves/valves control pressure near road for easy access

(ii) Study Fig. 9, an advertisement for natural gas.

Suggest why this advertisement states that natural gas is 'A cheap fuel. Easy to use'.

[4]

produced in Pakistan/in Balochistan/at Sui/not imported large reserves lightweight available in pipelines portable in cylinders cleaner than burning wood/coal easy to extract

Page 11	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(d) Explain the advantages and disadvantages of developing nuclear power.

Advantages (res. 2)

large output
reliable
small input of raw material/efficient
long lasting fuel
fossil fuels running out/reduce burden on other fuels
less pollution/environmentally friendly
will be less need for load-shedding/power cuts

Disadvantages (res.2)

expensive to buy fuel
expensive to build
lack of technology/skills/difficulties of maintainance
dangerous/risk of radioactivity
unpopular/local opposition
disposal of waste is a problem
risk of terrorism
use for bombs

[Total:25]

[6]

- 5 (a) Study Fig. 10, a bar chart showing population change from 1951 to 2001.
 - (i) What was the total population in 2001?

[1]

143-144 million

(ii) By how much did the total population increase from 1951 to 2001?

[1]

111-114 million

(iii) Compare the increase in the urban and rural areas.

[3]

more increase in rural/less in urban greater percentage increase in urban areas urban increase 5–48 million/by 43 million/approx. 9 times } rural increase 27–95 million/by 68 million/approx. 3.5 times } needs comparison

Page 12	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(b) Explain the causes of the population increase in Pakistan since 1991.

[5]

high birth rate

birth rate exceeds death rate

longer life expectancy/lower infant mortality/lower death rate

better health care/medical facilities

better care of the elderly/pensions

better sanitation and clean water/less disease

lack of family planning/use of contraceptives

traditional beliefs/want a son/Allah will provide (max.1)

unaware of population problem/lack of education on ---

need of family labour/lack of farm mechanisation

lack of education of women/early marriage

lack of government programmes

lack of transport to rural areas

(c) Describe the effects of population growth on the economy and development of Pakistan. [6]

Economy

shortage of money/foreign exchange to buy food etc./negative balance of payments need for foreign loans

debt

lack of money for investment

Development

overpopulation leading to -

shortages of -

food,

water,

education,

health services,

work/unemployment,

money/poverty

housing/homelessness/living on the streets/overcrowding/Kacha Abadi

pollution (must be named)

traffic congestion

high prices/inflation

power/fuel/load shedding

deforestation/trees/loss of farmland

little industrial development

(d) Study Fig. 11, a bar chart showing employment and unemployment in 2004.

(i) What percentage of people are unemployed in urban areas?

[1]

10

Page 13	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2009	2059	02

(ii) Why are many people unemployed in cities?

[5]

illiterate/uneduated
lack of skills/training
tertiary jobs/jobs needing qualifications
shortage of jobs/too many people/rural-urban migration
IT in offices
machines in factories
unfinished projects/slow economic growth/recession
new residents do not have contacts/family contacts

(iii) Suggest why the real number of people unemployed in rural areas may be higher than the figures recorded. [3]

under-employment/more people work on farms than are needed/disguised unemployment difficult to collect figures women not included? many self employed/subsistence farming/subsistence existence seasonal work e.g. sugar mills informal employment (as opposed to formal employment)

[Total: 25]
