UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

General Certificate of Education Ordinary Level

MARK SCHEME for the June 2005 question paper

7110 PRINCIPLES OF ACCOUNTS

7110/02 Paper 2 (Structured), maximum raw mark 100

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

 CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

[7]

(b) Control accounts provide totals of debtors and creditors.

Mary can see at a glance how much she owes

or

She can also see immediately how much is owed to her.

This helps her control the total levels of credit.

Control accounts are used to help in the construction of final accounts where accounts are not kept under full double entry.

Any 2 x 2 mark [4]

| Page 4 | Mark Scheme S | | Paper |
|--------|-------------------------|------|-------|
| | GCE O LEVEL – JUNE 2005 | 7110 | 2 |

(c) It is difficult to use control accounts to locate errors in Mary's accounts because of the lack of double entry

or

Control accounts are of limited use in Mary's business because of the lack of double entry.

Control accounts cannot act as a deterrent against fraud unless internal checks can be carried out.

Cannot check individual debtors and creditors balances.

In Mary's case, the control accounts do not provide a check because ledgers cannot be checked against the total figures from the books of prime entry.

Any 2 x 2 mark 1 for identification 1 for development

[max 4]

[Total 15]

4 (a) (i) Prime cost

\$
Direct material 146 300 **(1)**

Direct labour <u>175 400</u> (1)

Prime cost 321 700 **(1)**

[3]

(ii) Factory cost of production

Prime cost 321 700 (1)

Factory overheads 83 800 (1)

Change in work in progress _____

Factory cost of production $\underline{405500}$ (1)

(b) Direct costs can be specifically traced to a manufactured item. (1) Indirect costs cannot be traced to a manufactured item. (1)

Direct costs are included in prime cost. (1)

Indirect costs are included in factory overhead expenses. (1)

| Page 5 | Mark Scheme | Syllabus | Paper |
|--------|-------------------------|----------|-------|
| | GCE O LEVEL – JUNE 2005 | 7110 | 2 |

(c) (i) Going Concern

The directors of Carter Ltd use the going concern principle because they expect the business to continue for the foreseeable future.

This means that stock should be valued to reflect its normal use in the business and not the need to sell it immediately at auction.

Going concern value maybe higher or lower as work in progress may require finishing, incurring additional cost.

Any 2 x 2 mark 1 for identification 1 for development

[max 4]

(ii) Prudence (Conservatism)

Used to avoid overstating stock value.

Stock is recorded at cost or net realisable value, whichever is lower.

Net realisable value allows for the need for additional work on work in progress to make it of practical value.

A prudent approach avoids overstating profits.

A prudent valuation will reflect any work in manufacturing and work done on the raw materials converting them to work in progress.

Using the same principles year to year allows for better comparison.

Any 2 x 2 mark
1 for identification
1 for development

[max 4]
